Week 3: CSS3 & Responsive Web Design

- CSS Fundamentals & Selectors
- Box Model & Positioning Techniques
- Flexbox & Grid Layout Systems
- Responsive Design Principles
- Mobile-First Design Approach

~ Outcome: Ability to design visually appealing and responsive websites across devices.

Week 4: Advanced CSS & UI Components

- CSS Animations & Transitions
- Modern Navigation Menus
- Interactive UI Components
- Landing Page Design Techniques
- Design Consistency & Branding

~ Outcome: Ability to create engaging and professional website interfaces.

MONTH 2 – ADVANCED WEB DESIGNING & DEPLOYMENT

Week 5: JavaScript for Interactive Websites

- JavaScript Fundamentals
- DOM Manipulation
- Event Handling Techniques
- Form Validation
- Dynamic Content Creation

~ Outcome: Ability to build interactive and user-friendly website experiences.

Week 6: UI/UX Design & Website Optimization

- UI/UX Design Best Practices
- Wireframing & Prototyping Basics
- Website Accessibility Standards
- Performance Optimization Techniques
- User Journey & Experience Mapping

~ Outcome: Ability to improve website usability and optimize user experiences.

Week 7: Bootstrap & Modern Web Design Frameworks

- Bootstrap Framework Fundamentals
- Responsive Components & Layouts
- Navigation Bars & Cards
- Website Templates & Customization
- Cross-Browser Compatibility

~ Outcome: Ability to rapidly develop modern, responsive websites using industry-standard frameworks.

Week 8: Website Deployment & Professional Workflow

- Git & GitHub Fundamentals
- Website Hosting & Deployment
- Portfolio Website Development
- Design Documentation Standards
- Industry Best Practices

~ Outcome: Ability to deploy and maintain professional websites following industry standards.

LIVE PROJECT & CAREER READINESS

Major Project Development

Students work on real-world Web Designing projects such as:

- Business Portfolio Website
- E-Commerce Website Design
- Educational Institution Website
- Travel & Tourism Website
- Restaurant & Food Delivery Website
- Corporate Landing Page Design

Project Includes:

- Requirement Analysis & Planning
- Wireframing & UI Design
- Responsive Website Development
- User Experience Optimization
- Testing & Deployment
- Final Project Presentation

~ Outcome: Fully functional industry-level website demonstrating responsive design, UI/UX principles, interactivity, and deployment capabilities.

From beginner to job-ready — Become a Web Designing Professional in 2 Months.
